Mr. Ichord shared Mr. Beard's concern that the Soviets are presently placing a great deal of emphasis on developing their chemical warfare capabilities and that this could pose a major threat to the United States in the future. Mr. Beard expressed concern that this was not covered in the DCI's testimony before the Committee. [] reassured the members by stating that in a recent Community study on this subject, no evidence was found that would support the theory that the Soviets plan to use chemical warfare capabilities before nuclear weapons are employed. White and Whitehurst asked the DCI about the existence of a "white paper," supposedly from Moscow, which indicated that Ethiopia and Russia were attempting to set up "pockets of Russian influence" throughout the Horn (p. 69-70, transcript of 30 January). The Director said he was not familiar with this but indicated that he would be interested in getting a copy of the paper.
